PROFESSIONAL SUMMARY

Software Engineer with 2.5 years of experience building scalable backend systems and REST APIs using Java, Spring Boot, and Node.js, with strong expertise in microservices, distributed systems, and enterprise application development across banking and SaaS domains. Skilled in debugging, root-cause analysis, authentication, asynchronous processing, and performance optimization. Experienced in AI-augmented development using AI coding assistants (Claude Code, ChatGPT) to accelerate delivery while critically reviewing generated code for correctness and reliability. Strong foundation in system design, AWS cloud services, and DevOps practices.

WORK EXPERIENCE

Wybrid Technologies Pvt. Ltd. *Mumbai, India*

Backend Developer *Nov 2024 – Present*

- Contributed to a **SaaS-based workplace management** platform focused on optimizing real estate and workspace operations.
- Developed **backend modules** for contract, attendance tracking, and workspace allocation to support high-volume user operations, while also building responsive frontend components using React.js and integrating IRIS third-party APIs for the billing module.
- Designed and optimized RESTful APIs using **Node.js** and **Express.js**, improving response time by 30% and reducing server load.
- Implemented **JWT-based authentication** and **role-based access control**, enhancing application security.
- Implemented **asynchronous event-driven** background jobs and automated cron tasks using **Redis** for notifications and push notifications, improving concurrency handling and system reliability by 40%.
- Configured project-specific rules and used **Claude Code** for **AI-assisted development**, including requirement drafting and documentation, accelerating implementation, **debugging**, and refactoring while reducing development effort and enabling greater focus on functional requirements and validation.
- Worked with **Git, GitHub, GitHub Actions and AWS cloud services**, while collaborating with product and engineering teams through **Agile sprints, code reviews, and debugging sessions**.

Newgen Software Technologies. *Mumbai, India*

Software Engineer *Jan 2024 – Nov 2024*

- Developed and maintained enterprise banking applications using **Java, JavaScript, SQL (MySQL)**, and **Newgen Products (Omnidocs, iBPS and MDM),** translating business requirements into scalable Java backend solutions using object-oriented design.
- Developed and optimized enterprise **trade finance APIs** involving data transformation, filtering, and database operations, improving retrieval efficiency by 15% and resolving production issues by root-cause analysis across distributed enterprise systems.
- Worked within structured **SDLC processes**, handling debugging, deployment, technical documentation, and production support on oracle WebLogic servers across Windows and Linux environments.

TECHNICAL SKILLS

- **Programming Languages:** Java, JavaScript (ES6+), TypeScript, Object-Oriented Programming (OOP), Data Structures & Algorithms.
- **Backend Development:** Spring Boot, Microservices, J2EE, JMM, Node.js, Express.js, Client-Server Architecture, REST APIs, System Design, JPA/Hibernate, Object-Oriented Design (OOD).
- **AI-Assisted Development:** Integrating AI Agents, LLM-assisted development (Claude Code, ChatGPT), Prompt Engineering.
- **Cloud & Security:** AWS EC2, S3, Lambda, CloudWatch, Docker, CI/CD, Linux, Bash Scripting.
- **Databases:** NoSQL (MongoDB), SQL, Schema Design, Indexing, Query Optimization, Caching.
- **Frontend Development:** React.js, Redux, Next.js, HTML5, CSS3, Material UI, Context API, Tailwind CSS.
- **Tools & CI/CD:** Git, GitHub, GitHub Actions, Redis, Postman API Testing, VS Code, JIRA, VMware.
- **Methodologies:** Agile Scrum, SDLC, MVC, Unit Testing, JUnit, Integration Testing.

PROJECTS

Role Based Access Control – E-Commerce Application - *Project Link* *(Oct 2024 – Nov 2024)*

- Developed a scalable **role-based access control (RBAC)** system with secure REST APIs for Super Admin, Admin, Partner, and Customer workflows using Node.js, Express.js, MongoDB, and React.js, applying object-oriented design.
- Implemented **JWT-based authentication** and bcrypt password hashing, securing user sessions and sensitive data operations.
- Designed end-to-end product management workflow enabling Partners to manage products and Admins to verify/reject entries, reducing invalid product listings by 30%.

Mini JIRA - Task & Project Management Backend *(Aug 2026 – Sept 2026)*

- Built a **JIRA-inspired backend** using **Java, Spring Boot, Spring Data JPA, PostgreSQL, and REST APIs**, supporting project and task management, assignment, status tracking, validation, pagination, and **exception handling**.
- Designed **microservices** for User, Project, and Task management with **Spring Security/JWT, API Gateway**.
- Implemented **Kafka** based **asynchronous event processing** with **JUnit** testing and **Postman API** testing.

EDUCATION

- **B.Tech. in Information Technology —** Pillai College of Engineering | **CGPA: 9.54** *Mumbai (2020–2024)*
- **HSC (12th) —** Maharashtra Board | **82.92%** *Mumbai (2020)*

CERTIFICATIONS

- **Google Cloud Career Practitioner —** Google Developer Student Clubs (GDSC), Pillai College of Engineering (Jan 2023)
- **Claude Code 101 —** Anthropic (Jun 2026)

ADDITIONAL INFORMATION

- **Languages:** English (Professional), Hindi (Native), Marathi (Native), German (Beginner)
- **Soft Skills:** Problem Solving, Analytical Thinking, Ownership & Accountability, Cross-Team Communication, Quick Learner
